Hemerocallis (Day Lillies)

Amazing progress has been accomplished by breeders in the past few years with these delightful waxen, fragrant lily-like flowers held on tall graceful stems, with beautiful grass-like foliage. They are now obtainable in all shades from palest yellow to deep orange, pink, rose pink, red, brown-maroon and the combinations of these shades. They adapt themselves to almost any climate and will do well in any type soil. They prefer sun or partial shade and a moderate amount of water. In fact, they will stand more hot, dry weather than almost any flower—right along with the irises.

There are hemerocallis that will open up in the evening so that if you are entertaining at night you may use these beautiful flowers in arrangements and not be afraid of them 'going to sleep' on you. The old type hemerocallis could not be used at night, if you recall. By careful selection of early and later blooming varieties, bloom may be continuous from Spring to Fall. We like to plant in the fall beginning about September. Then next Spring you will get some blooms and as each year comes the clump grows and more blooms are produced.

We are specializing in Iris and Hemerocallis. If you have not tried these wonder flowers, don't put it off another year. They are being used as foundation plants among evergreens and shrubbery or as a garden all to themselves. Our prices are very low for quality plants as we do not print a catalog.

You are welcome to visit us at any time and we especially invite you during the blooming season. We wish to thank all our former customers for their liberal patronage and we shall be happy to welcome new customers as well as old back again this year. We strive to please. If you receive your plants in good condition they will grow if you plant them right. Always spread the roots out when planting, and let the crown of the plant come even with surface. Don't put fertilizers next to the plant. You may feed these by placing fertilizers between plants—mulching with castor bean hulls is good for winter, won't hurt to keep some on the bed year around. If you do not receive in good growing condition, please notify us at once. These plants are State inspected. Thank you.
